

To whom it may concern,

The Professional Helicopter Pilots Association (PHPA) has been working with the Los Angeles Philharmonic/Hollywood Bowl in spreading the word about the summer concerts and the impact helicopter flyovers have on the outdoor theatre.

A large part of our outreach is the distribution of colorful posters to local airports detailing the span of time we are in season and asking pilots to avoid the area.

The outreach effort during our 2015 season had a noticeable reduction in the frequency of flyovers during our concert times. It is the Bowl's intention to continue to work with the PHPA to continue the success of 2015 into future seasons.
